

Contribution to Climate Protection

10.08.2019

LUCA PFYFFER

Forest in Nicaragua with a value of CHF 220.00

Donation of CHF 7.00

This contribution to climate protection is having a real impact!

This reforestation project in Nicaragua, the second poorest country in the western hemisphere, supports small farming families in reforesting unused parts of their land with native trees. The programme offers concrete measures for climate protection, while at the same time creating new sources of income for local families.
